Storage Tanks!*

## FRO Series Reverse Osmosis Storage Tanks

Flexcon Industries has established itself as a leader in pressure tank technology. The FRO Series reverse osmosis storage tanks are the latest in a long line of innovative, high quality products. Made of superior materials and meeting the stringent standards of NSF 58, these tanks are available in 3 sizes. At the heart of the tank is a 100% butyl rubber diaphragm that has been post cured to eliminate any unwanted taste and odors. Combined with a polypropylene liner it keeps system water contained in a sealed water chamber. A double gasketed stainless steel connection assures the integrity of the water treatment system. The bottom dome of the smaller tanks has been enhanced with 4 rounded legs to insure installation stability and the 14 gallon tank includes a rugged poly base. Each tank is pressure tested and has a maximum working pressure of 125 PSI.

# FRO Series

## Reverse Osmosis Storage Tanks

## Specifications

Model	Tank		Dimensions (inches)		Weight (lbs)
	Volume	Capacity	Diameter	Height	
FRO 122	3.2	2.5	9"	13¾"	7.5 lbs
FRO 132	4.4	3.2	10.9"	13¾"	9 lbs
FRO 1070	14	10.3	15.2"	22½"	24 lbs

Maximum working Pressure: 125 PSI • Connection: 1/4" stainless steel MPT • Pre-charge: 7 psig

Model	Tank Precharge PSIG	Drawdownn Gallons @ Listed System Pressure					
		20	30	40	50	60	70
